

KIT908AB_Small is a development kit that includes the SDEV908AB32 board and the USB-ML-MON08 interface cable.

The SDEV908AB32 is a low cost development board for the MC68HC908AB32. The SDEV908AB32 has a MON08 debug header to allow debug and programming of the MC68HC908AB32 processor from one of P&E's hardware interfaces. All the processor pins are available on 0.1" spaced holes. Wire-wrap headers and a circuit diagram are included with the SDEV908AB32 board.

The USB-ML-MON08 is one of P&E's USB-port-to-target MON08 interfaces.
