

PIC32 USB Starter Kit III

Part Number: DM320003-3

The PIC32 USB starter kit – III provides the user with an easy and cost effective option to experience the USB, mTouch and SPI/I2S functionality of the new PIC32MX3/MX4 microcontrollers. The board comes equipped with everything that is needed including Microchip's free USB software to develop USB embedded host/device/OTG applications.

The PIC32 USB starter kit - III has the same form factor and expansion connector as the PIC32 starter kits enabling it to connect with other PIC32 expansion boards.
