

## **MRF49XA PICtail Plus Daughter Board (868/915 MHz)**

### **Mature Product**

### **Part Number: ac164137-2**

The MRF49XA PICtail/PICtail Plus Daughter Board is a demonstration and development daughter board for the MRF49XA ISM Band Sub-GHz RF Transceiver.

### **Features**

- Plugs into multiple Microchip Technology demonstration and development boards
- Compatible with the PIC18 Explorer Board (DM183032) for 8-bit microcontroller development
- Compatible with the Explorer 16 Development Board (DM240001) for 16-bit microcontroller development
- Supported MiWi software stack and radio utility driver can be downloaded from the Microchip website at:
