

Extension-of-Life®

End-of-life solutions from Rochester Electronics

– NEW PRODUCT INTRODUCTION – **EP910DI-30**

Rochester Electronics has re-introduced and continues to manufacture critically needed semiconductors with the full authorization of the original manufacturer and an attention to quality that meets or exceeds the original component.

Original Manufacturer:

ALTERA

Re-introduced by
Rochester Electronics on
June, 18, 2012

EP910DI-30

Original Part Number: **EP910DI-30**

Description: **EPLD**

Package: **40 pin DIP**

Manufacturing Flow: **Industrial**

Manufacturing Type:

made from original Altera wafers

HIGH PERFORMANCE EPLD with a 24-macrocell array design

The Altera EP910 EPLD is a high-performance, 24-macrocell Classic EPLD. It features combinatorial speeds with tPD as low as 12 ns, counter frequencies of up to 100 MHz, and pipelined data rates of up to 100 MHz. The EP910, EP910T, and EP910I are all pin-, function-, and programming file-compatible

with each other and are available in both a J1CC and DIP packages (windowed versions only available on ceramic package styles). The EP910 also features a programmable clock option for independent clocking of all registers.
