

3.5G HSDPA USB Modem for high speed wireless internet at any time and any place - just insert your SIM card! This new version is compatible with both Mac and Windows computers/laptops/notebooks/netbooks.

High Speed: With HSDPA (aka High-Speed Downlink Packet Access aka 3.5G), you gain download speeds of up to 7.2Mbps, letting you browse the internet, email your friends, chat online, and download files at speeds that surpass most public WiFi hotspots.

Easy Access: Simply insert your 3G compatible SIM card, plug in the HSDPA USB Modem, and you're ready to surf - easy as that. The convenient plug-and-play design detects the modem and begins installing the software from the USB stick automatically, allowing you to take your internet with you anywhere, on the road, in the office, worldwide.

Total Compatibility: No matter where you are in the world, this HSDPA USB Modem allows for high speed wireless internet access 3G networks. It even provides backwards compatibility with quad-band GSM/EDGE/GPRS networks (2G, 2.5G, 2.75G), which means wherever you have cellphone signal, you can access high speed internet!

Multiple Functions: Even with your SIM card inside the HSDPA USB Modem, you can still keep in touch with your contacts through SMS messages. The easy-to-use interface keeps track of your inbox/outbox/drafts folder, and allows for send/reply/forward messages to phonebook or manually entered contacts.

With this HSDPA USB Modem, the world at your fingertips. If you own a laptop, netbook or notebook, then ensure yourself you will always be able to access the internet by ordering this 3.5G HSDPA USB Modem today. This USB modem is fully backed by our 12 month guarantee and is in stock now and ready for next day shipping. Available only from the leaders in wholesale electronics and tech gadgets, Chinavasion.
